

Omnigo Incident Reporting

INCIDENT REPORTING SOFTWARE

Enable your security team to track, report, and analyze data trends so they can improve prevention and response for your organization.

MAINTAIN VISIBILITY IN THE FIELD

Streamline data collection, reporting, and analysis to allow your security officers to spend more time in the field, where they are needed, and less time writing reports.

RESPOND QUICKLY & EFFECTIVELY

When an incident occurs, response needs to be as swift as possible. Our comprehensive, integrated incident reporting solution improves your ability to respond quickly while ensuring valuable security intelligence is not lost.

KEEP YOUR SECURITY OPERATIONS RUNNING SMOOTHLY

Gain a comprehensive view of data across your entire organization with a centralized platform that simplifies reporting, budget analysis, and background investigations.

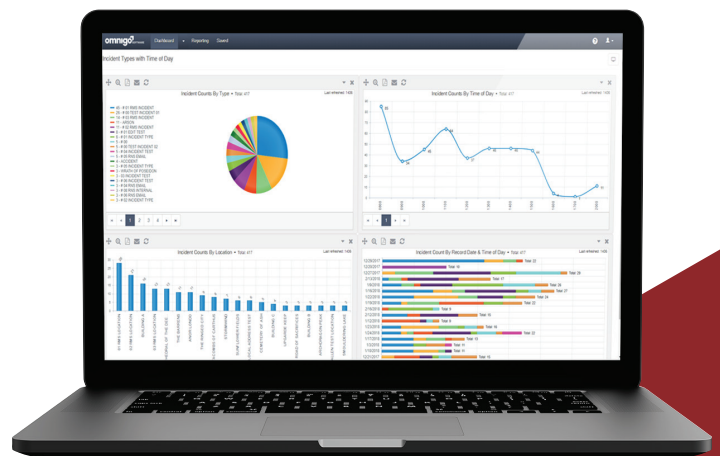

MAKE PREVENTION A PRIORITY

Prevention is critical but can be difficult with outdated or ineffective technology. Omnigo's data-driven reporting system provides easy access to incident data and features built-in analysis tools that can help in developing preventative measures.

GAIN INSIGHT & TAKE ACTION

Built-in data analysis tools provide deeper insight into incident trends, enabling your team to take a more strategic approach to prevention.

Simplify incident reporting with a comprehensive, integrated solution

SCALE TO MEET YOUR NEEDS

Manage security across multiple departments, locations, or facilities with a flexible, scalable solution that's ideal for growing organizations. Create group- or location-specific reports that feed into a central, unified database that can be used for organization-wide reporting and analysis.

IMPROVE EFFICIENCY & BOOST ROI

Increase accuracy and save valuable time for your security department and administrators by automating complex, time-consuming processes. Measure and record activities to help quantify your department's contributions, justify budget requests, and ensure funds are spent responsibly.
