

# Omnigo Visitor Management

## VISITOR MANAGEMENT SYSTEM

Maintain the safety of your facilities by automating your visitor check-in/check-out process.

### GREET, MANAGE, & TRACK VISITORS

Replace your visitor log book with a secure, paperless digital solution that creates a 360° view of your guests for accountability, compliance, and enforcement.

### SCALE TO MEET YOUR NEEDS

Implement an end-to-end solution that can be scaled from one to hundreds of workstations across multiple properties, local or globally, all sharing a single, centralized database.

### OFFER SELF SERVICE WITH A VISITOR MANAGEMENT KIOSK

Offer self-service visitor registration, sign-in, and management with an optional **Omnigo Visitor Management Kiosk**. Ideal for high-traffic buildings or unsupervised lobbies and reception areas, the easy-to-use kiosk guides visitors through a step-by-step registration and sign-in process for both new or existing pre-registered visitors.

### GENERATE BADGES & VISITOR LOGS

Print single- or multi-property badges, send visit notifications, and collect NDAs, photos, and visit details for guests of your facility.

### STREAMLINE VISITOR CHECK-IN

Simplify the registration process for both employees and visitors and save time with pre-registration, one-click sign-in/out, and on-demand badge printing for new or returning visitors.

### INTEGRATE FOR ADDED CAPABILITIES

Optional integration with **Omnigo Incident Reporting** provides access to existing personnel, banned/watched subjects, and location databases, reducing the need for duplicate visitor information or multiple redundant data entry.

## Improve safety with an end-to-end visitor management system
