

Omnigo Records Management

PUBLIC SAFETY RECORDS MANAGEMENT SYSTEM (RMS)

Streamline data collection, instantly access critical information, create mandatory and audit reports, and securely disseminate information into the right hands.

STREAMLINE DATA COLLECTION

Gather critical details and automatically populate common report fields when an incident occurs. Simplify data entry with an easy-to-use interface, custom fields, and rich text features.

QUICKLY OBTAIN CRITICAL DETAILS

Easily search within a unified database and allocate relevant incident details for crime reporting, state and federal reporting, and auditing purposes.

EASILY CONDUCT CRIME ANALYSIS

Recognize crime trends, identify needed resources, and simplify planning of departmental budgets with built-in data analysis tools.

ACCESS DATA IN THE FIELD

Equip your officers with access to accurate and up-to-date information in the field with **Mobile Patrol** to improve their ability to respond and better protect themselves.

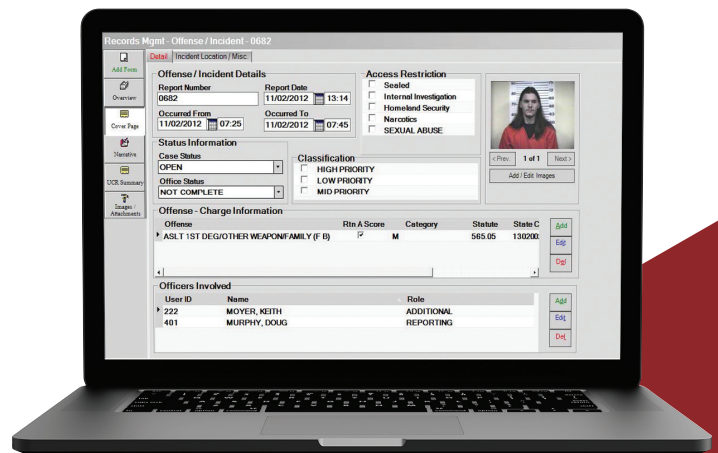

IMPROVE COMMUNICATION & RESPONSE

Fully integrates with **Omnigo Computer-Aided Dispatch**, a fully customizable CAD system designed to help ensure accurate communication and reduce response times.

ENSURE NIBRS COMPLIANCE

Make your agency's transition from the Uniform Crime Reporting (UCR) program to the National Incident-Based Reporting System (NIBRS) simpler and easier to manage with one-click data-entry validation and automated electronic report submission.

Keep officers serving and protecting without the administrative hassle

CUSTOMIZABLE

Customize fields to meet the needs of your agency (except hard-coded fields required for state interfaces). Create custom reports from any field in Omnigo's public safety software database with **Query/Report Writer**.

PROFESSIONAL

Produce clean, professional narratives with the built-in spell check and rich text features of **Officer's Narrative**, and prepare sanitized press reports with **Press Narrative**.

USER FRIENDLY

Easy to learn and simple to use, the user interface remains consistent—whether in use in a patrol vehicle, at an office workstation, or at home—to reduce training and make accessing the software more convenient.

SECURE

Data security is built in, with 256-bit Advanced Encryption Standard (AES) protocol securing every packet of data sent, whether across wired or wireless networks.

ADDITIONAL CAPABILITIES:

- » Case Management
- » Case Notes
- » Citations/Summons
- » Accident Reports
- » Arrest & Booking
- » Images & Attachments
- » Internal Email
- » Field Interview
- » Offender Registration
- » Offense/Incident Reports
- » Officer Daily Reports
- » Officer's Narrative
- » Persons (Victims, Witnesses, etc.)
- » Photo Lineups
- » Press Narrative
- » Property & Evidence
- » Racial Profiling
- » Solvability
- » Supplemental Reports
- » Vehicle Tow
- » Warrants

— *plus many optional interfaces*
