EVENT Football Post Game Operations

EVENT Football Pre Game Operations

- ☑ 01) Confirm personnel check-in meets tr... requirements
- ☑ 02) Brief traffic team supervisors
- ☑ 03) Verify barricades in place with public works
- ☐ 04) Confirm lots opened with stadium facilities staff
- ☐ 05) Dispatch parking lot roaming patrols
- ☐ 06) Confirm VIP security detail in place
- ☐ 07) Verify sniper overwatch in place
- ☐ 08) Gates Opened

When it comes to fast-moving and critical situations, time is of the essence. While some events are unpredictable, the unfortunate reality is that most incidents can be prevented with proper pre-planning measures and having the right security technology in place.

Omnigo's comprehensive security event planning solution–Rhodium, ensures that organizations are ready to mobilize their security teams and act quickly–when it matters most.

Rhodium is engineered with cutting-edge technology to meet the specific needs for event planning, managing incidents in real-time, and automating post-event Incident Command System (ICS) forms and submissions.

From comprehensive analytics and reports to robust layered mapping capabilities for greater visibility, Rhodium does it all.

SOFTWARE FEATURES TO LOOK FOR:

Combines all the essential tools needed for event planning and incident response.

From day-to-day events to large scale, multi-agency events, Rhodium is intuitive and scalable for any organization.

» Robust mapping features provide the ability for users to create custom map layers from both inside and outside the event location

» Immediately get clarification on individual team assignments, know where your staff is, and instantly change assignments as needed

» Track and record what's happening in every area and see it all in one place

» Constant communication between ground staff and operations center decreases the time for critical information to be distributed to necessary parties allowing for increased response time

» Mobile solution provides simple to use and powerful tools to the people in the field to document security checks and flag suspicious items, people, or situations, triggering notifications

A COMPLETE COMMAND AND CONTROL SOLUTION TO CONSOLIDATE INFORMATION, COORDINATE ASSETS QUICKLY, AND TAKE THE APPROPRIATE ACTIONS NEEDED.

Rhodium is a cloud-based solution, providing seamless integration and interoperability for functions such as pre-planning, dispatch, incident management, and records management. Intuitive and fully scalable to handle any situation or event, from day-to-day incidents to large-scale, multi-agency responses.
