

An End-to-End Solution from Crime Scene to Court

INVESTIGATION &
CASE MANAGEMENT

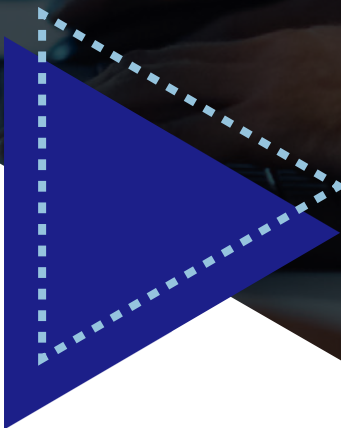

PHYSICAL
EVIDENCE

DIGITAL
EVIDENCE

COURTS

**TODAY'S AGENCIES NEED AN INTEGRATED,
END-TO-END SOLUTION THAT CAN HANDLE CASE
MANAGEMENT FROM INITIAL CALL TO DISPATCH
TO FINAL DISPOSITION OF EVIDENCE.**

Omnigo's mobile-enabled, cloud-based platform streamlines evidence collection, storage, management, access, court presentation, and disposition ... **all in one integrated digital ecosystem.**

Handle high-volume media files, ensure a fully auditable chain of custody, and **present court-admissible evidence** while reducing time and labor costs – and risks to evidence.

Evidence in a single case can come from numerous sources... and it's up to you to protect and preserve all of it properly.

OFFICERS

INVESTIGATORS
CRIME LABS

CIVILIANS/
THIRD PARTIES

Gather, Organize, and Store

SAFEGUARD EVIDENCE IN ANY FORMAT
AS IT'S COLLECTED

Physical and digital evidence must be properly collected, processed, labeled, and stored:

- Chain of custody established, documented, protected
- Case association and storage locker details for physical evidence
- Organization, access, and chain of custody control for digital evidence
- Dates established for statutes of limitations and disposition

May include items from:

- Computers
- Emails
- Cellphones
- Cloud drives
- External drives and media storage
- Social media
- Cameras: Body-worn, in-car, police scene, personal
- Interview room CCTV
- Home/business security footage

Extraction of mobile device, cellphone, and GPS data can provide critical evidence for establishing and helping to **prove incident timelines and locations.**

Large-capacity media seized as evidence in criminal investigations may be **1 terabyte (TB)** or even larger – that's equivalent to 17,000 hours of compressed audio.¹

Collect and Process

UPLOAD EVIDENCE INTO A SINGLE, CENTRALIZED,
INTEGRATED DATA REPOSITORY

Streamline collection and processing of both digital and physical evidence:

- Automated workflows integrate with collection tools such as mobile devices, body-worn cameras, dash cameras, scene cameras, interview audio files, CCTV
- Automatic metadata applied to digital files
- Manual meta tagging also available
- Automated transcription of audio files
- Automated processes improve standardization according to policies and procedures
- Create, print, and scan barcode labels for case association and organization of physical files

Cloud-based and mobile-enabled:

- Meet high-capacity storage needs for large digital files and/or vast volumes of evidence
- Intuitive, easy-to-use, mobile-ready interface streamlines data collection in the field
- Establish chain of custody at upload

Create a segregated, public-facing, civilian upload portal:

- Validate files at upload
- Establish chain of custody
- Cybersecurity protections reduce threats of malware, ransomware, hacking

U.S. CRIMINAL JUSTICE INFORMATION SERVICES (CJIS) COMPLIANCE

Government entities that access or manage CJIS data must ensure compliance to protect and secure sensitive data and government networks against cyberattacks while safeguarding civil liberties and protecting the privacy of individuals and businesses.

INVESTIGATION & CASE MANAGEMENT | PHYSICAL EVIDENCE | DIGITAL EVIDENCE | COURTS

Manage and Access

ORGANIZE AND CONTROL ACCESS WHILE PROTECTING
CHAIN OF CUSTODY AND ADMISSIBILITY

Prevent lost or misplaced evidence:

- Organized database structure standardizes storage and organization
- Easy to search by multiple properties
- Permission controls prevent movement or deletion of files in error
- High-capacity cloud storage and built-in backups prevent data loss

Associate digital and physical evidence by case:

- All digital files associated with a case are organized within the established, standardized database structure
- All physical evidence labeled by barcode with storage location recorded

Simplify evidence analysis, add transparency and accountability:

- Automated transcriptions make audio files easier to search
- Streamlined data mining: emails, photos, videos, etc.
- Discover and document connections between suspects, cases, etc.
- Granular access and permission controls – restrict access by file, case, department, individual, etc.
- Automated file access log creates auditable chain of custody

Serve up evidence reports responsively to all stakeholders without sacrificing confidentiality:

- Civilians: litigants and witnesses
- Officers
- Crime scene analysis
- Laboratory analysts
- Specialists and experts
- FOIA requestors (insurance, journalists, third parties)
- District attorneys
- Prosecutors
- Defense attorneys
- Court Clerks
- Government agencies

TIME ADDS UP

Officers, investigators, lab techs, and administrative personnel can spend hours requesting evidence, copying digital files to CDs or drives, and picking up and delivering storage devices.

A single, permission-restricted evidence repository streamlines the process of requesting and accessing files, significantly reducing the time demands on personnel – while protecting the integrity of digital evidence files.

EVERY SECOND COUNTS:

Extract Mobile Data & Build a Timeline

- ▶ **Investigation and Case Management** extracts mobile data from devices in **30 – 60 minutes** – not days, weeks, or months
- ▶ Plots **GPS coordinates**
- ▶ Searches all **contacts, browser history, calls and texts**
- ▶ Quickly and accurately create a graphic investigation timeline depicting **events, locations, times, dates, and people** that's easy to view and understand
- ▶ Get **fast access to the data** you need most
- ▶ **Eliminate the manual workload** and lag time associated with data extraction from mobile devices

INVESTIGATION & CASE MANAGEMENT | PHYSICAL EVIDENCE | DIGITAL EVIDENCE | COURTS

Package and Present

CREATE ORGANIZED, USER-FRIENDLY PRESENTATION
PACKAGES FOR COURT CLERKS AND JUDGES

Save time, demonstrate probable cause, and support complete presentation of all admissible evidence in a case:

- Easy-to-navigate case dashboard
- Case timelines
- Links and protected access to all relevant digital evidence

INVESTIGATION & CASE MANAGEMENT | PHYSICAL EVIDENCE | DIGITAL EVIDENCE | COURTS

Disposition: Archive or Purge

AUTOMATED PROCESSES PROTECT EVIDENCE UNTIL
STATUTES OF LIMITATIONS ARE MET

Statutes associated by case:

Customized and updated to accurately reflect purge dates

Get automated notifications for purging or archiving:

- Optimize digital and physical storage spaces
- Control costs
- Maintain compliance
- Prevent lost, misplaced, or mishandled evidence over time
- Streamline processing and response for FOIA requests

SERVE ALL STAKEHOLDERS WITH ONE SECURE SOLUTION

FROM INITIAL DISPATCH TO FINAL DISPOSITION OF EVIDENCE

Protect privacy, ensure transparency, and demonstrate accountability at every step
