

SAFER, SMARTER DETENTION MANAGEMENT

One Tool to Track All Inmate and Facility Details

Omnigo's Jail Management Software (JMS) provides full detention management capabilities for municipal and country jails of virtually any size.

Ideal for integration with other Omnigo public safety software modules, JMS provides both inmate and facility management in one simple-to-use package that allows you to track every detail associated with the inmates, expenses, and activities of your facility.

ENHANCE SAFETY WITH SMARTER INMATE TRACKING

JMS includes a Medical Intake Questionnaire and an inmate Assessment to determine appropriate levels of confinement. Users can also include information on medication usage, criminal activity, and known associate/gang affiliations. In the event of previous encounters within Omnigo's JMS or RMS, data is auto populated to reduce data entry.

SAVE TIME WITH STREAMLINED OPERATIONS

Jail Incident Reports are built in, allowing corrections officers to document non-criminal incidents. Inmate Restrictions can then be managed and appear on the Overview screen for quick reference. With Omnigo's option NCIC interfaces, visitors can be quickly processed, complete with wanted/warrant checks.

CONVENIENT INMATE BANKING

Omnigo's JMS module includes an inmate banking system and has optional interfaces for third-party commissary systems.

Additional features include:

- ▶ Inmate activities
- ▶ Inmate overview
- ▶ Visitor control/badge printing
- ▶ Restrictions and alerts
- ▶ Watch lists
- ▶ Query/report writer
- ▶ Medical Events
- ▶ Medications & dispensing
- ▶ Alias tracking
- ▶ Known associates/gang affiliations
- ▶ Criminal activity
- ▶ Optional interfaces for Third-Party Commissary, Victim Notification NCIC, and Live Scan
