SOLUTIONS FOR LAW ENFORCEMENT

LAW ENFORCEMENT SOLUTIONS PORTFOLIO

Efficiently capture, manage, and share information from dispatch to deposition between law enforcement personnel, department divisions, and court systems using a highly configurable and integrated portfolio of capabilities with an intuitive interface and centralized data.

COMPUTER-AIDED DISPATCH

COMMAND AND PLANNING

MOBILIZE YOUR RESOURCES AND COORDINATE THEIR EFFORTS AROUND A SCHEDULED EVENT OR INCIDENT RESPONSE USING CENTRALIZED PREPLANS AND REAL-TIME COMMAND CENTER CAPABILITIES

PLAN

Create new or input existing preplans and associate them with critical resources such as response checklists, building floor plans, and evacuation routes - then connect with CAD to auto-launch by incident location or type.

RESPOND

Execute and manage response plans using a central command board map that provides real-time, location-based information including deployed resources, surrounding traffic conditions, active log, and streaming CCTV cameras.

RECOVER

Analyze response performance post-event by examining logged data such as time for resources to arrive on scene, checklist effectiveness, access to buildings - then make changes directly in the plan based on learnings.

COMPUTER-AIDED DISPATCH

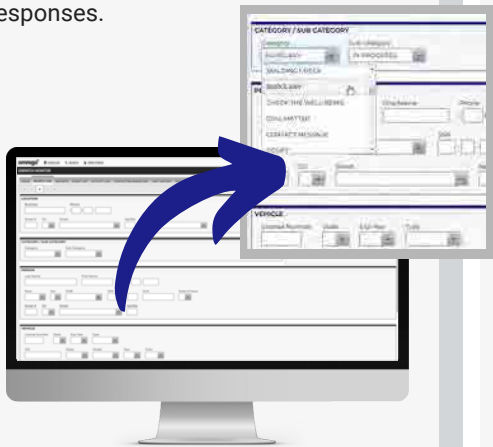

omnigo

REDUCE THE TIME TO DISPATCH BY STREAMLINING DATA ENTRY AND SIMPLIFYING OFFICER ASSIGNMENT

FAST, DICTIONARY-DRIVEN DATA ENTRY

Reduce the time and effort entering data by simply typing the first few letters in any field, such as building location or dispatch reason, and allowing automatic search and population using a customized dictionary of appropriate responses.

EASY DRAG AND DROP DISPATCH

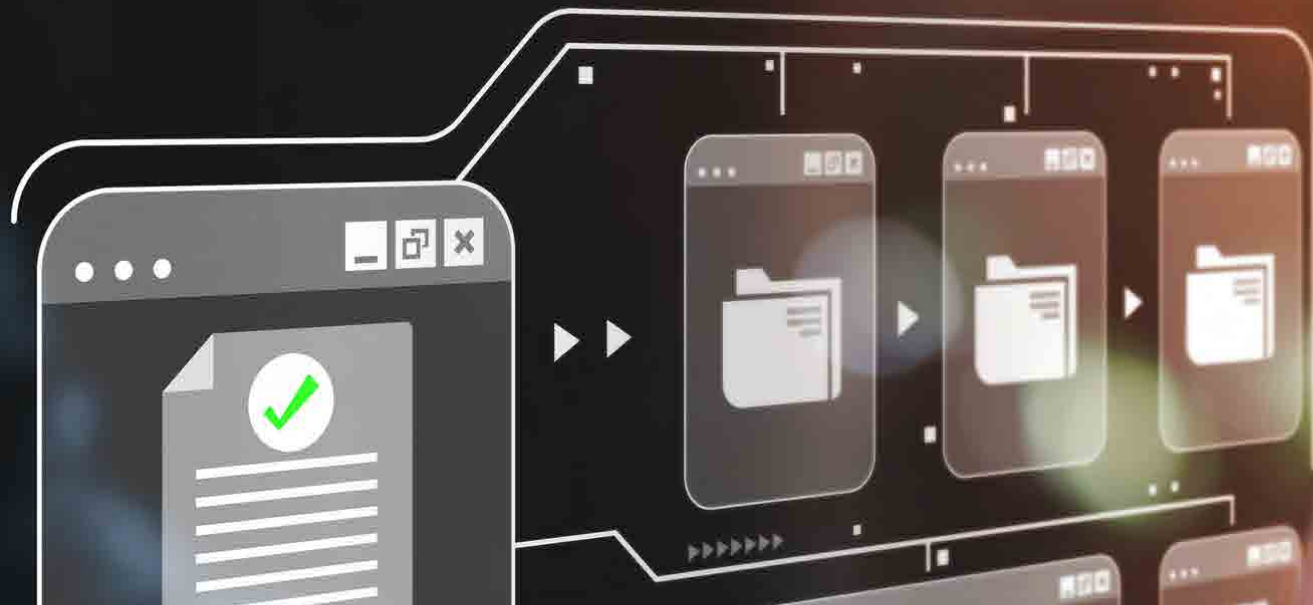

Effortlessly assign an officer, or multiple officers, to a current or pending call by dragging and dropping the officer onto the appropriate dispatch.

THIRD-PARTY INTEGRATIONS

Expand your dispatch center's capabilities by linking to popular Omnigo and federal, state, regional, and third-party systems including E911, Automatic Location (AVL), Mobile Computing (Silent Dispatch), Dispatch Map, NCIC, and Medical Alert.

RECORDS MANAGEMENT

omnigo

PROVIDE MORE TIME FOR PATROLING AND COMMUNITY ENGAGEMENT BY REDUCING THE BURDEN OF REPORT WRITING ON OFFICERS

FOCUSED NAVIGATION

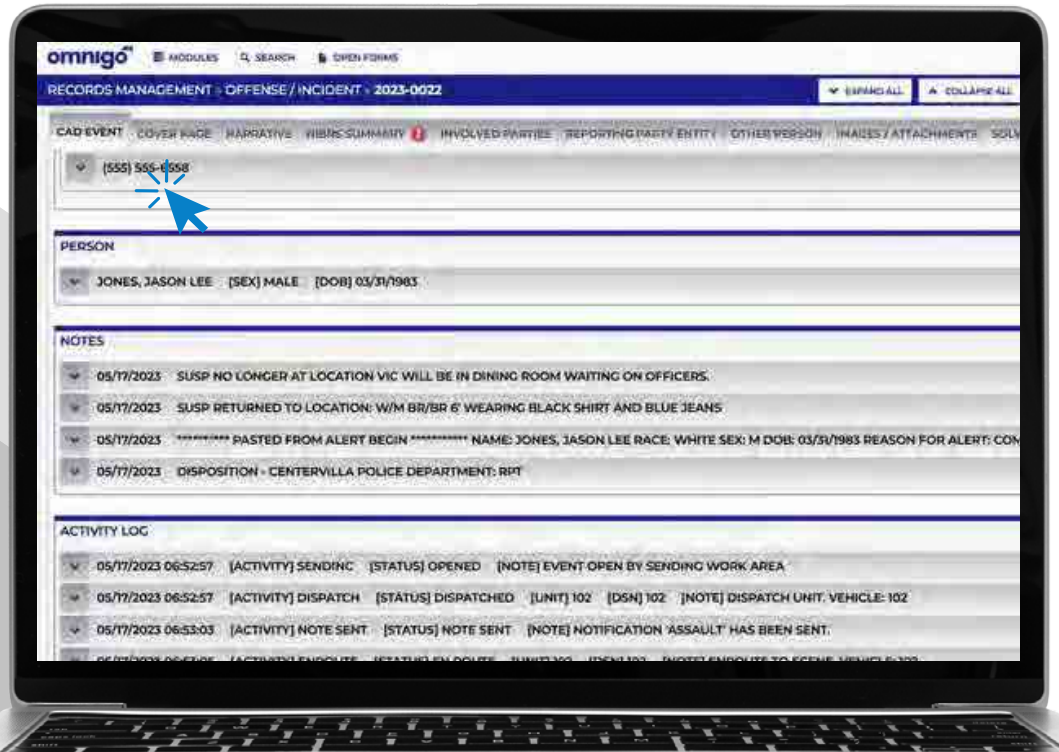

One touch, tab-based navigation directs your attention to the data you're providing or searching within your report such as the Narrative, Images, or a detailed list of CAD Events, versus spending time scrolling through one continuous screen.

REPORT COLLABORATION

Save time during or at end of shift by writing supplemental reports during, or even before, the responding officer starts the offense report using the system's ability to allow multiple people to work simultaneously on the same report.

SYSTEMS INTEGRATION

Tight integration with other Omnigo and third-party data sources allows information to flow directly into the RMS and used for time-saving workflows such as automatic population of Involved Parties data provided by a NCIC run.

EVIDENCE MANAGEMENT

omnigo

CLEAR OFFICERS FROM SCENES FASTER BY STREAMLINING EVIDENCE GATHERING AND INCIDENT REPORT ENTRY USING A MOBILE PATROL APP

CAPTURE DIGITAL EVIDENCE

Document incidents quickly by capturing images and videos and then annotating each using voice to text or keyboard entry.

DICTATE NOTES WITH EASE

Create detailed and lengthy notes easily using voice to text dictation with embedded spellcheck and the ability to append or edit text manually.

PROCESS PHYSICAL EVIDENCE ON SCENE

Start processing physical evidence on scene including photographing, printing evidence bag labels and receipts, and submitting to evidence lockers or shelves at any location.

RECORD INTERVIEWS

Record audio interviews, pausing and resuming recording when needed to execute other functions in the app or on the mobile device.

DOCUMENT PARTIES QUICKLY

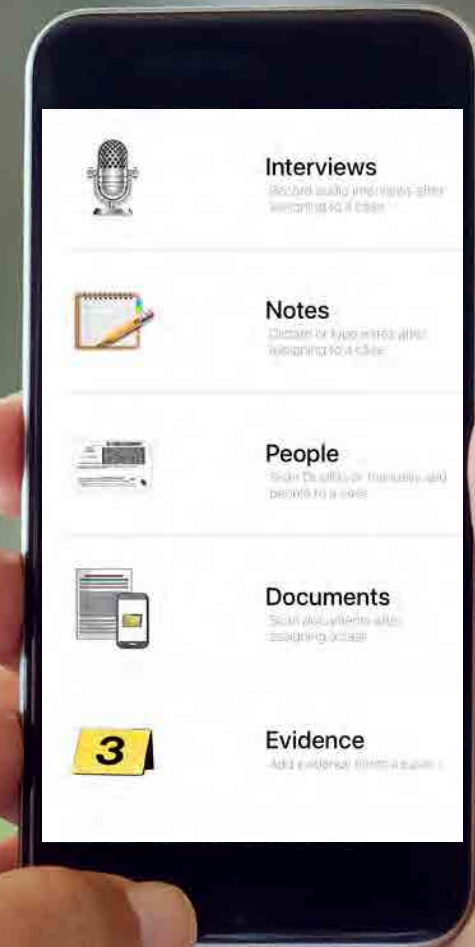

Easily add witnesses, suspects, and other parties to the incident report by scanning the barcode on backs of driver licenses or ID cards.

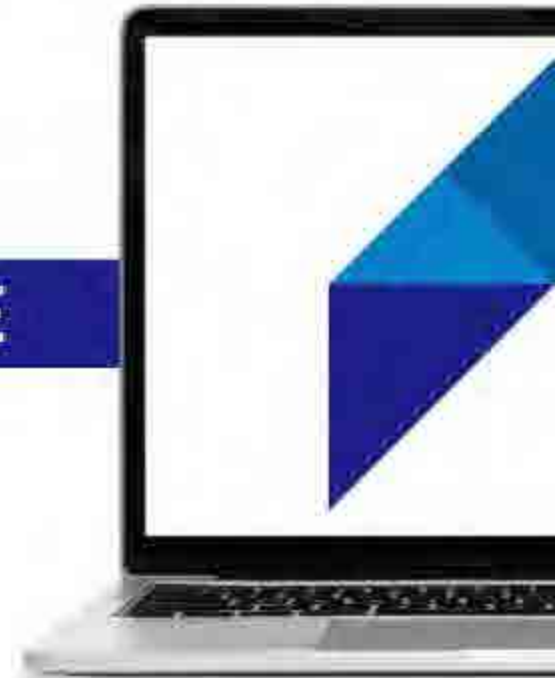

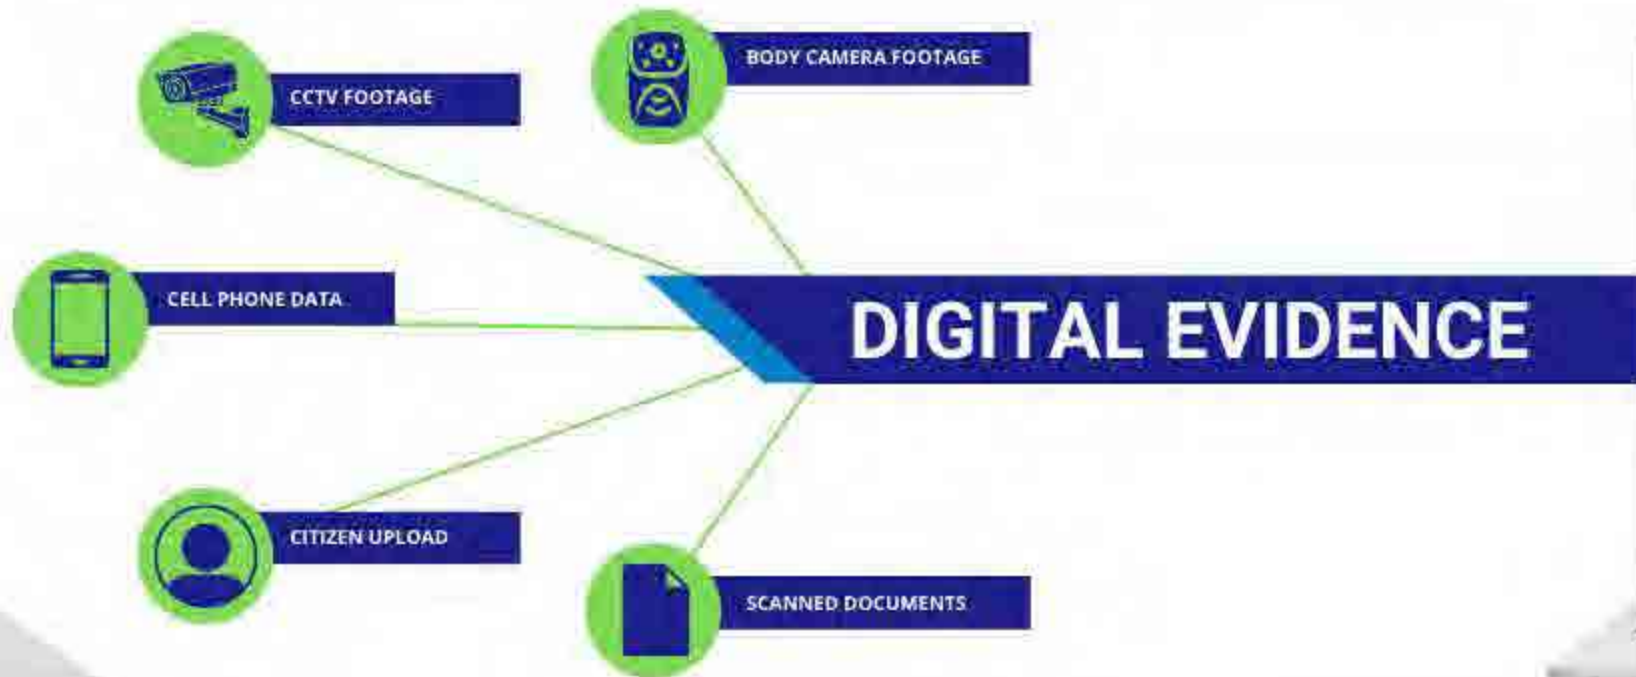

SCAN DOCUMENTS

Scan single or multi-page documents such as vehicle registrations and proof of ownership certificates, and upload each as a single PDF file.

PROTECTION FROM DISCOVERY

Officer personal devices are protected from being opened to discovery in court as no meta data is shared.

SUBMIT

Upload digital evidence regardless of the source or manufacturer, including body worn camera and CCTV video, citizen-provided photos and videos, audio files, and scanned documents.

Guided workflows during upload ensure evidence is assigned to the appropriate case and data such as Crime Charged, Investigator, and Source are captured.

MANAGE

Organize digital evidence using a familiar file folder structure and find items quickly with flexible queries such as case number, date range, and text within transcriptions.

Easily share files with prosecutors and District Attorneys through a CJIS compliant Virtual Viewing Room where you manage privileges like downloading and re-sharing of evidence.

PURGE

Proactively manage the size of your digital storage through the automatic purging of files using customizable rules.

Create rules using multiple criteria such as purging videos tagged as non-evidentiary after 90 days from uploaded date and include a notification to a specific user or group of users before taking action.

EFFICIENTLY SUBMIT, MANAGE, AND PURGE DIGITAL AND PHYSICAL EVIDENCE IN A SINGLE SYSTEM

PHYSICAL EVIDENCE

FIREARMS

NARCOTICS

ASSAULT KIT

VEHICLE

CURRENCY

SUBMIT

Enter new evidence using a guided workflow that makes each step of the process such as identification, barcode printing, and assigning an evidence locker quick and easy while protecting chain of custody, security, and compliance rules.

Custom forms such as currency, firearm, and assault ensure mandatory information is captured with each submission.

MANAGE

Quickly locate items using flexible queries such as case number, bar code, or date range and see their location by building, locker, shelf, or box.

Maintain accurate inventory with random audit and inventory reports, including exception reports such as Missing in Expected Location, Found in Wrong Location, or Missing Entirely.

PURGE

Actively manage storage space within your evidence room through the proactive and automatic purging of evidence.

Set suggested purge dates based on criteria like the statute of limitations for the crime and allow the system to automatically send emails or generate letters to individuals for approval or extension of the purge date.

ACCELERATE THE PROGRESS OF YOUR INVESTIGATIONS BY ORGANIZING, DEVELOPING, AND MANAGING ALL CASES FROM A CENTRAL POINT OF COMMAND

STAY INFORMED

Customizable dashboard and notifications draw immediate attention to any changes or updates to the investigation such as testimony from a new witness.

ASSIGN TASKS

Get assistance moving the investigation forward by assigning tasks to resources and monitoring the status to completion from within the system.

DOCUMENT CORRESPONDENCE

Easily record and document interactions with people involved or related to the investigation including phone calls, emails, and walk-ins.

UNCOVER CRITICAL CONNECTIONS TO INVESTIGATIONS

Easily query across all cases and evidence to discover connections such as relationships between your suspect and other bad actors established in other cases.

TRACK INVESTIGATION PROGRESS

Review every step in the investigation along an automatically generated timeline that includes the date and time each piece of evidence was logged and person became involved.

DRAW MORE VALUE FROM YOUR DEMS

Investigations Case Management can compliment your existing manufacturer's Digital Evidence Management System (DEMS) by including its evidentiary items in the investigation flow.

PROTECT AGAINST THE FINANCIAL IMPACT OF LOST ITEMS OR OVERSPENDING BY USING A ROBUST ASSET MANAGEMENT, MAINTENANCE, AND REPORTING SYSTEM

RECEIVE ASSETS

Quickly receive assets into inventory by scanning a barcode you create or one existing on supplier packaging. The scan shows quantity on hand, storage location, and future orders for the item.

KIT ASSETS

Speed the issuing and maintenance of assets by kitting smaller serialized assets with a larger one. Individual items such as a radio, MDT, or control box within a patrol car are inventoried and easily hot swapped when in need of repair or replacement.

MANAGE ASSETS

Proactively manage assets with automated alerts that can signal an expiration date, total number of uses, or low stock level. Budgetary alerts can notify when spending exceeds set maximum and suspend new purchase order submissions.

ISSUE AND TRANSFER ASSETS

Easily issue assets to or transfer between individuals, locations, and organizations by scanning the item barcode and selecting the recipient from a dropdown list.

MAINTAIN ASSETS

Schedule, assign, and track asset maintenance such as an annual inspection on a vehicle or an unplanned repair to its light bar. Labor and part costs, as well as total service time, are recorded for easy measurement against budget and technician workload.

EMPLOYEES SELECT ASSETS

Reduce time spent fulfilling requests for inventoried items by providing a self-service option through a department managed online store. A speaker mic damaged in a foot chase can be ordered by an officer and delivered directly to the station or for pick-up from the Quartermaster.

EVERSURE

At Omnigo, the greatest contribution we make to your success is ensuring your enjoyment and creative use of our products for life. Central to this belief is our commitment to providing you ongoing access to the services and resources we know play a critical role in getting you there.

Included with every product, Omnigo EverSure™ is a unique blend of ongoing training, consulting, and support services that continuously protects and increases the value of your investment as your business evolves.

TRAINING

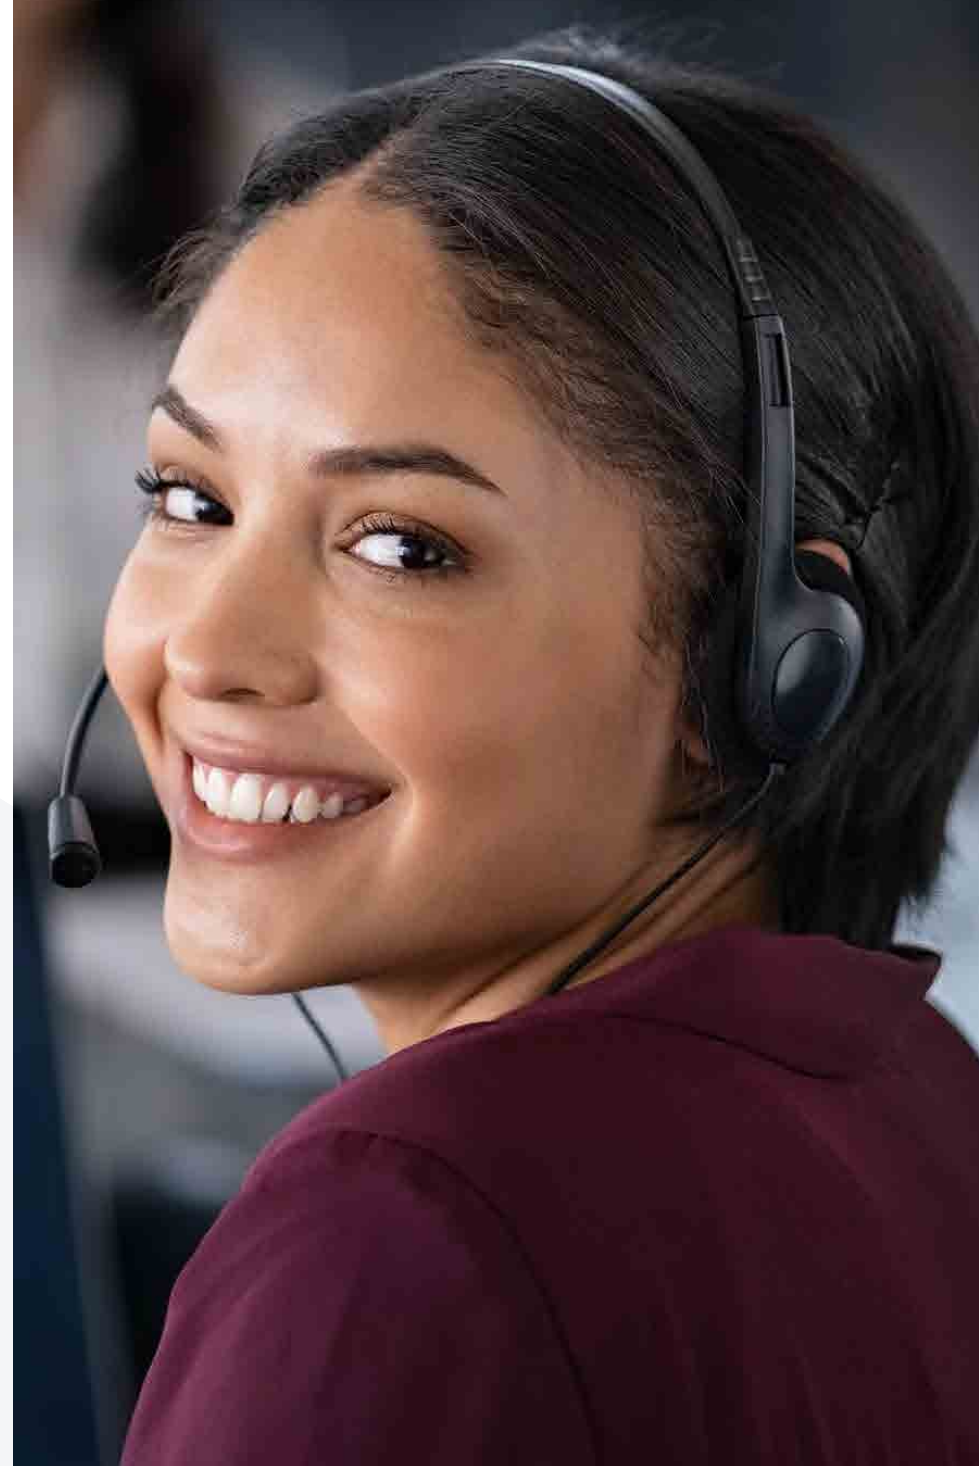

As your business changes, so do the people who use your Omnigo products. There's no need to rely on train the trainer or other internal efforts to keep everyone current. EverSure closes the knowledge gaps by providing New User Training, Refresher Training, and 24/7 online access to Omnigo University.

CONSULTING

When new mandates enter the business, they often require you to examine and adjust your work processes for compliance. Don't leave anything to chance. EverSure can get you in alignment by providing consulting services including Configuration Optimization, Security Optimization, and Product Enhancements and Insights.

SUPPORT

Everything runs fine until it doesn't. And that's when you need all the help you can get. EverSure offers you an assist any way, any time through Live Agent Help Desk, 24/7 Emergency Support, and 24/7 Online Support Portal.
