SOFTWARE SOLUTIONS FOR COURTS

Control Every Piece of Court Evidence

Manage digital and physical court evidence in one unified court evidence management system, ensuring secure intake, complete chain of custody, and efficient handling from submission through final disposition.

Gain Control of Every Physical Exhibit.

Move beyond paper-based processes and disconnected tracking methods with a structured approach to managing physical evidence. From storage through authorized handoffs and final disposition, courts maintain clear accountability and visibility across each case.

Capture and Track from the Moment of Intake

Move beyond paper-based processes and disconnected tracking methods with a structured approach to managing physical evidence. From storage through authorized handoffs and final disposition, courts maintain clear accountability and visibility across each case.

Track Location and Status with Confidence

Know where each exhibit is at a glance, whether in storage, in transit, or in the courtroom, based on the most recent authorized handoff and current status.

Audit Chain of Custody in Seconds

View the complete exhibit history with one click. Automatically recorded logs show who handled the item, when, and why, making audits and courtroom questions easier to resolve.

Streamline the Flow of Digital Evidence

Move beyond email, shared drives, and physical media with a centralized approach to managing digital evidence. From submission through review and sharing, every file is securely received, controlled, and accessible without delays or uncertainty through digital evidence submission built for courts.

Receive Evidence Without Physical Media

Allow attorneys, law enforcement, and external parties to upload files through a secure evidence submission portal, eliminating USB drives, discs, and in-person delivery.

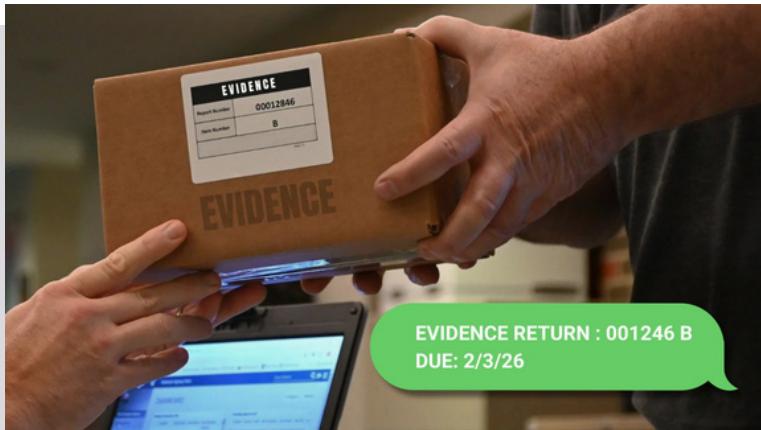

Share Securely with Full Visibility

Control access with role-based permissions, enable time-bound sharing in a secure virtual viewing room, and maintain a complete audit trail of evidence activity.

Find Evidence Fast with Advanced Search

Locate files using case details and search within documents, audio, and video using OCR and transcription to surface the information you need quickly.

Automate Court Exhibit Return and Disposal

Automate the return and disposal of court exhibits by automatically notifying submitting parties and using workflows to take action based on court stipulations and retention policies. These evidence retention workflows support consistent court exhibit return processes through case closure.

Alerting Exhibit Owners

With one action, a court-authorized user can mark a case as complete and trigger an automated workflow that sends a disposal date email alert to parties with uploaded exhibits.

Authorizing Disposal

Exhibit custodians receive automatic alerts for cases requiring review and can accept or reject disposal based on court policy, returning exhibits to the clerk when needed.

Statistical Reporting

Manage personnel time and data resources using standard and custom real-time reports, including totals for uploaded exhibits and exhibits purged.
