

PHYSICAL EVIDENCE MANAGEMENT

FOR COURT SYSTEMS

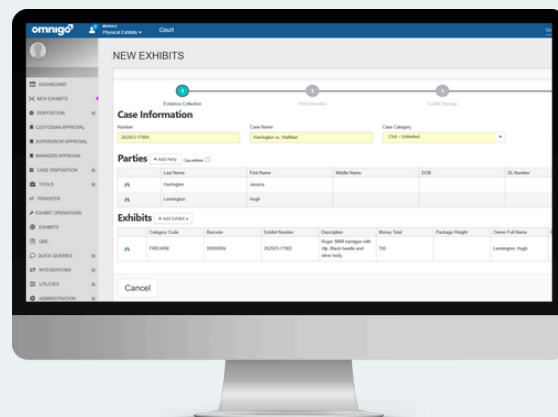

PHYSICAL EVIDENCE MANAGEMENT

Accelerate the movement of physical evidence in your courtroom using a cloud software platform that securely manages all evidence from submission to return or disposal.

SUBMIT EVIDENCE WITH SPEED AND CERTAINTY

Replace handwritten tags and paper logs with a streamlined digital intake process that ensures every exhibit is logged accurately, barcoded instantly, and traceable from the moment it enters court custody—eliminating delays, errors, and uncertainty.

SUBMIT WITH SPEED

Accelerate the intake process by logging exhibit details into a digital system that captures required fields upfront. Custodians can quickly generate and print a barcode tag that's affixed to the physical item—ensuring every exhibit is logged and traceable from the start.

ENSURE ACCURACY

Eliminate guesswork and reduce errors with automated data validation and customizable intake fields. Every exhibit is entered with consistency, ensuring the right information is captured every time—supporting chain of custody and courtroom confidence.

TRACE FROM INTAKE

Every item begins its lifecycle with a digital record. From the moment it's received, the exhibit is linked to a case, tagged with a unique barcode, and tracked in real time—giving courts full visibility and traceability from day one.

MANAGE EVIDENCE WITH COMPLETE ACCOUNTABILITY

Maintain full visibility into each exhibit's status, location, and handling history—ensuring every item is properly managed, securely stored, and readily available when needed.

STAY ORGANIZED

Manage every exhibit with confidence using a centralized system that mirrors your court's workflow. Sort and filter items by case, type, status, or location—so clerks and custodians can instantly see what's in storage, what's been presented, and what needs attention.

STORE SECURELY

Assign each item to a defined storage location and restrict access by role or user. Whether it's in long-term storage or checked out for court, the system tracks every movement—ensuring sensitive exhibits are secure and accounted for at all times.

AUDIT IN SECONDS

View the complete history of any exhibit with a single click. Automatically recorded chain-of-custody logs show who handled the item, when, and why—making audits, reviews, and courtroom challenges faster and easier to resolve.

AUTOMATE EVIDENCE RETURN OR DISPOSAL

Automated alerts, step-by-step workflows, and documented approvals make it simple to return or dispose of evidence while ensuring every action is fully authorized and compliant.

GET INSTANT INSIGHT

A simple menu click gives court-authorized users clear visibility into each exhibit's status and the ability to act instantly—whether that means approving disposal or generating a notification letter.

AUTOMATICALLY ALERT

Exhibit Custodians receive automatic alerts for cases requiring further review with the option to accept or reject disposal, returning evidence to the clerk with reasons selected from a customizable drop-down list.

ACT WITH CONFIDENCE

Items marked for disposal are scanned out, transported to the proper facility, and documented with a destruction certificate—giving courts the proof they need that every exhibit was handled correctly and in compliance.
