

# SHELDON

AN **omnigo** SOLUTION

## Meet SHELDON. Your Re-opening Solution.

SHELDON combines contactless temperature scanning and intelligent identity recognition with actionable tracking capabilities that help you mitigate risk, reduce cost, and return to work or campus with health and safety top of mind.

### HERE'S WHAT SHELDON DOES:

- ✓ Safeguards your facilities with end-to-end tracking and risk management intelligence.
- ✓ Delivers rapid ROI by reducing health and safety screening costs.
- ✓ Screens facility entrants at speed and scale (up to 30 individuals per minute).
- ✓ Mitigates potential risk of non-compliance and business interruption (CDC, OSHA, Department of Health, and relevant regulatory agencies).
- ✓ Installs quickly with no impact on IT staff or existing infrastructure.

The SHELDON kiosk is integrated with Omnigo's innovative identification and tracking platform, allowing you to validate and alert your staff of potential threats to health and safety. It also captures and stores data on all scanned subjects to facilitate ongoing incident reporting and prevention of future entry by banned individuals.
